

To Start - install the downloaded application by clicking on the file to start the install. To run it, click **Start**, click **All Programs**, click **Accessories**, click **Communications**, and then click **Remote Desktop Connection**.

This software package will install the client portion of Remote Desktop on any of the following operating systems: Windows 95, Windows 98 and 98 Second Edition, Windows Me, Windows NT 4.0, or Windows 2000. (This is the same version of the client software as in Windows XP Service Pack 1.) When installed, this software allows older Windows platforms to remotely connect to a MYOnVO.

Note The Remote Desktop Connection software is pre-installed with Windows XP. This software package can also be found on the Windows XP Professional and Windows XP Home Edition product CDs and can be installed on any supported Windows platform. To install from the CD, insert the disc into the target machine's CD-ROM drive, select **Perform Additional Tasks**, and then click **Install Remote Desktop Connection**.
